

## PSRx Advisors delivers help for Data Validation

The Centers for Medicare and Medicaid Services (CMS) require MA-PD and PDP plans to maintain ongoing monitoring of their Medicare Part C and D programs. The new Part C and D Data Validation requirements are effective for calendar year 2010. Plan sponsors are beginning the process of scoping the effort of selecting a Data Validation Contractor and assessing their Q1 2011 budgets when DVR reporting begins. An independent look at the organization's state of readiness will help guide your next steps.

## A CMS DVR from PSRx Advisors provides plan sponsors with a first step review of:

- Budget support for recommended actions including a high/low dollar range with associated assumptions and calculations.
- Gap Analysis of policies and procedures.
- Gap Analysis of required data.
- Recommendations on completing the Organizational Assessment Instrument (OAI).
- Consulting assistance to walk through findings and recommendations, including vendor selection strategy, or referrals where desired.

## PSRx Advisors offers a low cost / low impact approach to understanding what you will need to do. We will:

- Review your existing documentation.
- Facilitate one or two day on-site "mini-workshops" with key staff to familiarize them with the new requirements while we gather information.
- Compare your information against each regulation to identify the gaps in data and policy.
- Summarize our findings and recommendations and present them in a strategy call.

## Predictable costs, quality and outcomes

- Experienced staff with the strongest data experience in the industry uniquely qualifies us to help scope the impact of the new regulations on your organization.
- Independent analysis provides an unbiased view of your state of readiness.
- Budget range and methodology makes planning simpler.

PSRx Advisors is a leading next-generation health information entity built specific to monitor government programs. We provide data audits, risk analysis and applications that support a thorough oversight strategy. PSRx Advisors applications, audits, and management solutions are powered by TRICAST, Inc. and support an effective Medicare Part C & D oversight and compliance strategy.
